- Construction site delivery
- Consolidated delivery by arrangement

Product developments

- Optimisation of existing individual components
- New developments according to customer specifications and in close cooperation
- Sampling prior to tool construction using 3D printing
- Numerous DEFLEX patents & utility models

DEFLEX

CODE OF CONDUCT

Living responsibility. Strengthening trust.

In a dynamic and complex business world, one thing is crucial: trust. It is built through responsible behaviour – by each and every individual. That is exactly what DEFLEX® stands for.

Compliance with the law is our foundation

We act in a legally compliant, transparent and reliable manner – this applies to every area of our company. Our products and services create genuine added value for our customers – always in accordance with applicable law, our internal standards and ethical principles.

Honest. Respectful. Reliable.

Our Code of Conduct sums up what matters at DEFLEX®: honesty, mutual respect and responsibility. It provides guidance in everyday life, sets out clear guidelines – and helps us make the right decision in every situation.

Responsibility begins with each individual

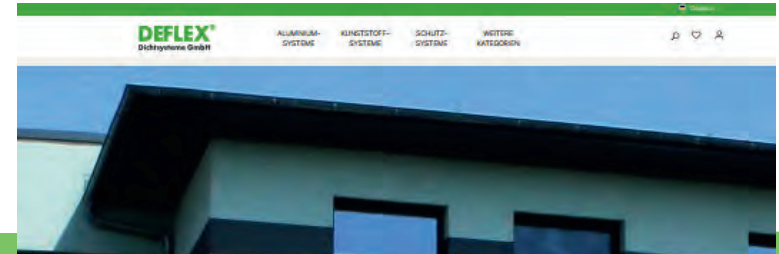

DEFLEX® employees bear responsibility – for their own actions and for the trust placed in us by our customers, partners and colleagues. Our management exemplify our values, actively promote compliance with our rules – and provide guidance.

Strong together: For compliance and success

Violations of laws or internal guidelines not only endanger individuals, but also the success of the company. That is why compliant behaviour is a matter of course for all of us. Only together we can ensure our long-term success – through integrity, fairness and reliability.

CUSTOMER FOCUS

B2B WEBSHOP
WWW.DEFLEX24.DE

-  24/7 Flexible Ordering
-  Individual Access
-  Price Overview
-  Product Search

Close. Personal. Digital.

With a strong field service team and experienced office-based contacts, we offer our customers reliable and transparent product support.

Our international sales team works closely with partners from the window and metal construction industries, system houses, manufacturers and distributors – in Germany, Europe and worldwide. If necessary, we can be on site quickly – that's customer proximity in action.

Customised solutions for your construction project

Standard isn't enough? We develop tailor-made solutions for your specific construction situation – even in small series.

Our product management and technical consulting team provides you with personalised support: from the selection of suitable materials such as EPDM or TPE to the individual sealing profile. We use 3D printing to create prototypes quickly and flexible – for individual pieces or series production.

PORTFOLIO

High-quality products for manufacture and installation of windows, doors and façades

DEFLEX® sealing systems - with system. For 40 years.

As an independent system partner, DEFLEX® is one of the leading suppliers of accessories for windows, doors and façades. We develop, manufacture and supply tested quality products – perfectly tailored to all common plastic and aluminium systems.

For four decades, our brand has stood for first-class sealing systems, innovative special solutions and a wide range of products for professional use. DEFLEX® means original equipment manufacturer quality that professionals in window and façade construction trust.

We seal windows, doors and façades!

Surface protection films (also with customer logo), cleaners, aids

Accessories

Tools, occupational safety

DÄMMFLEX – strong, lightweight, versatile

Dämmflex combines maximum compressive strength, excellent thermal insulation and low weight – perfect for pre-wall installation, insulation and lightweight construction applications.

PORTFOLIO

INSECT SCREEN

- Tension frames
- Hinged and swing doors
- Roller blind systems
- Pleated blind systems
- Light well covers

Protection of windows, doors and façades

DEFLEX® protection systems – genuine added value for you and your customers.

With DEFLEX® insect screens, you can rely on over 25 years of experience. We offer customised solutions for all installation situations – from tension frames, including special shapes, to hinged and swing doors, to pleated systems up to 4 metres wide. Please feel free to contact us.

The protection systems are complemented by custom-made flood protection. The aluminium dam beam system offers fast and reliable protection for doors and gates in emergency situations.

**Protection systems:
lucrative additional business for you.**

Think sustainably. Shape the future.

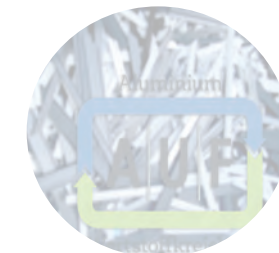

Sustainability is firmly anchored in DEFLEX®'s DNA – economically, ecologically and in terms of partnership.

Together with our employees, we develop innovative solutions that are not only economical, but also create real added value for our customers and partners.

Our active sustainability strategy is evident in every step we take: from the selection of resource-saving materials and suppliers to recycling-friendly product designs and environmentally conscious manufacturing.

We focus on maximum recycling, energy-efficient technologies and actively promote biodiversity.

DEFLEX® stands for responsible action – today and for the world of tomorrow.

CERTIFICATS & EXAMS

Certified quality

Certified according to DIN EN ISO 9001:2015 since 1994

Ongoing testing by independent institutes. Continuous process improvement & customer satisfaction.

Initial type testing

CE marking according to DIN EN 14351-1

CE compliant for Europe-wide distribution. Compliance with all legal requirements and national specifications.

DEFLEX® Partner system

5-year warranty on many products

5 million € reinsurance cover. Tested functional safety for installers.

Tested quality. Produced responsibly.

At DEFLEX®, tested product quality is our top priority. In close cooperation with renowned testing institutes – such as ift Rosenheim – we regularly test our products for practical suitability, safety and compliance with standards. This means we not only meet the requirements of CE marking

and the Construction Products Regulation, but also our own high quality standards.

Our manufacturing takes place exclusively in certified production lines within Europe – mostly in Germany. ‘Designed and made in Germany’ is not just a promise for us, but a reality we live by.

We also take responsibility when it comes to product safety and environmental protection: numerous DEFLEX® products are considered ‘articles’ within the meaning of the REACH Regulation. We proactively inform our customers if products contain ingredients that are on the European

Chemicals Agency’s (ECHA) current list of substances of very high concern. We monitor this list regularly.

Transparency included: safety and technical data sheets can be found at any time in our web shop directly with the respective product.

Future-proof.
Reliable.
Product expertise
‘Made in Germany’.
